protein gel stains
rna stabilization reagent
column-based gel dna extraction kits
site-directed mutagenesis systems
culture nutritional supplements
reverse transcriptase
bovine serum albumin
unstained protein molecular weight markers
enzymes
t4 polynucleotide kinase
balanced salt solution
nutritional supplements
column-based dna plasmid miniprep kits
pre-cast polyacrylamide gels
nitrocellulose blotting membranes
pvdf membranes
high-fidelity pcr systems
first-strand cdna synthesis systems
chemiluminescent substrates
acrylamide/bis solution
pre-cast tris-glycine gels
gel culture dissociation reagents
phosphate-buffered saline
column-based dna plasmid miniprep kits
goat serum
tris-edta (te) buffer
based microbial dna purification kits
